

Mathematics: Learning to Add

Grade Level: Grade 1

Topic: Introduction to Addition (+)

Addition means putting things together! When we add, we find out how many there are in total.

1. Counting Together

Look at the examples below. We use the plus sign (+) to join groups and the equals sign (=) to show the total.

- **Example 1:**

2 apples + 1 apple = 3 apples

[**] + [*] = [***]

- **Example 2:**

3 balls + 2 balls = 5 balls

[ooo] + [oo] = [ooooo]

2. Let's Practice!

Try to solve these addition problems. You can use your fingers or draw circles to help you count!

1. $1 + 1 = \underline{\quad}$

2. $2 + 2 = \underline{\quad}$

3. $3 + 1 = \underline{\quad}$

4. $5 + 0 = \underline{\quad}$

5. $4 + 2 = \underline{\quad}$

Teacher's Note

Encourage students to use real objects like stones or bottle tops (manchila) to practice these sums at home.
